When a user browse into our site. He/she will see the following page like this:

When a user click on About on the navigation bar. He/she will learn about our project :

About Online Exam

Project Description Here...

Online examination system is a project where user can give Quiz examination ,in this project there has two panel. They are-

✓ Admin Panel

✓ Exam Panel

✓ Admin panel can insert, delete, edit Question and Exam Panel can only see the Question and answer it. They have no access to modify it. Then the Admin Panel Judge the given Answers and show the result.

When a user click on Our Team on the navigation bar. He/she will know about our team members:

When a user click on Log in on the navigation bar. He/she will see some photos of our university:
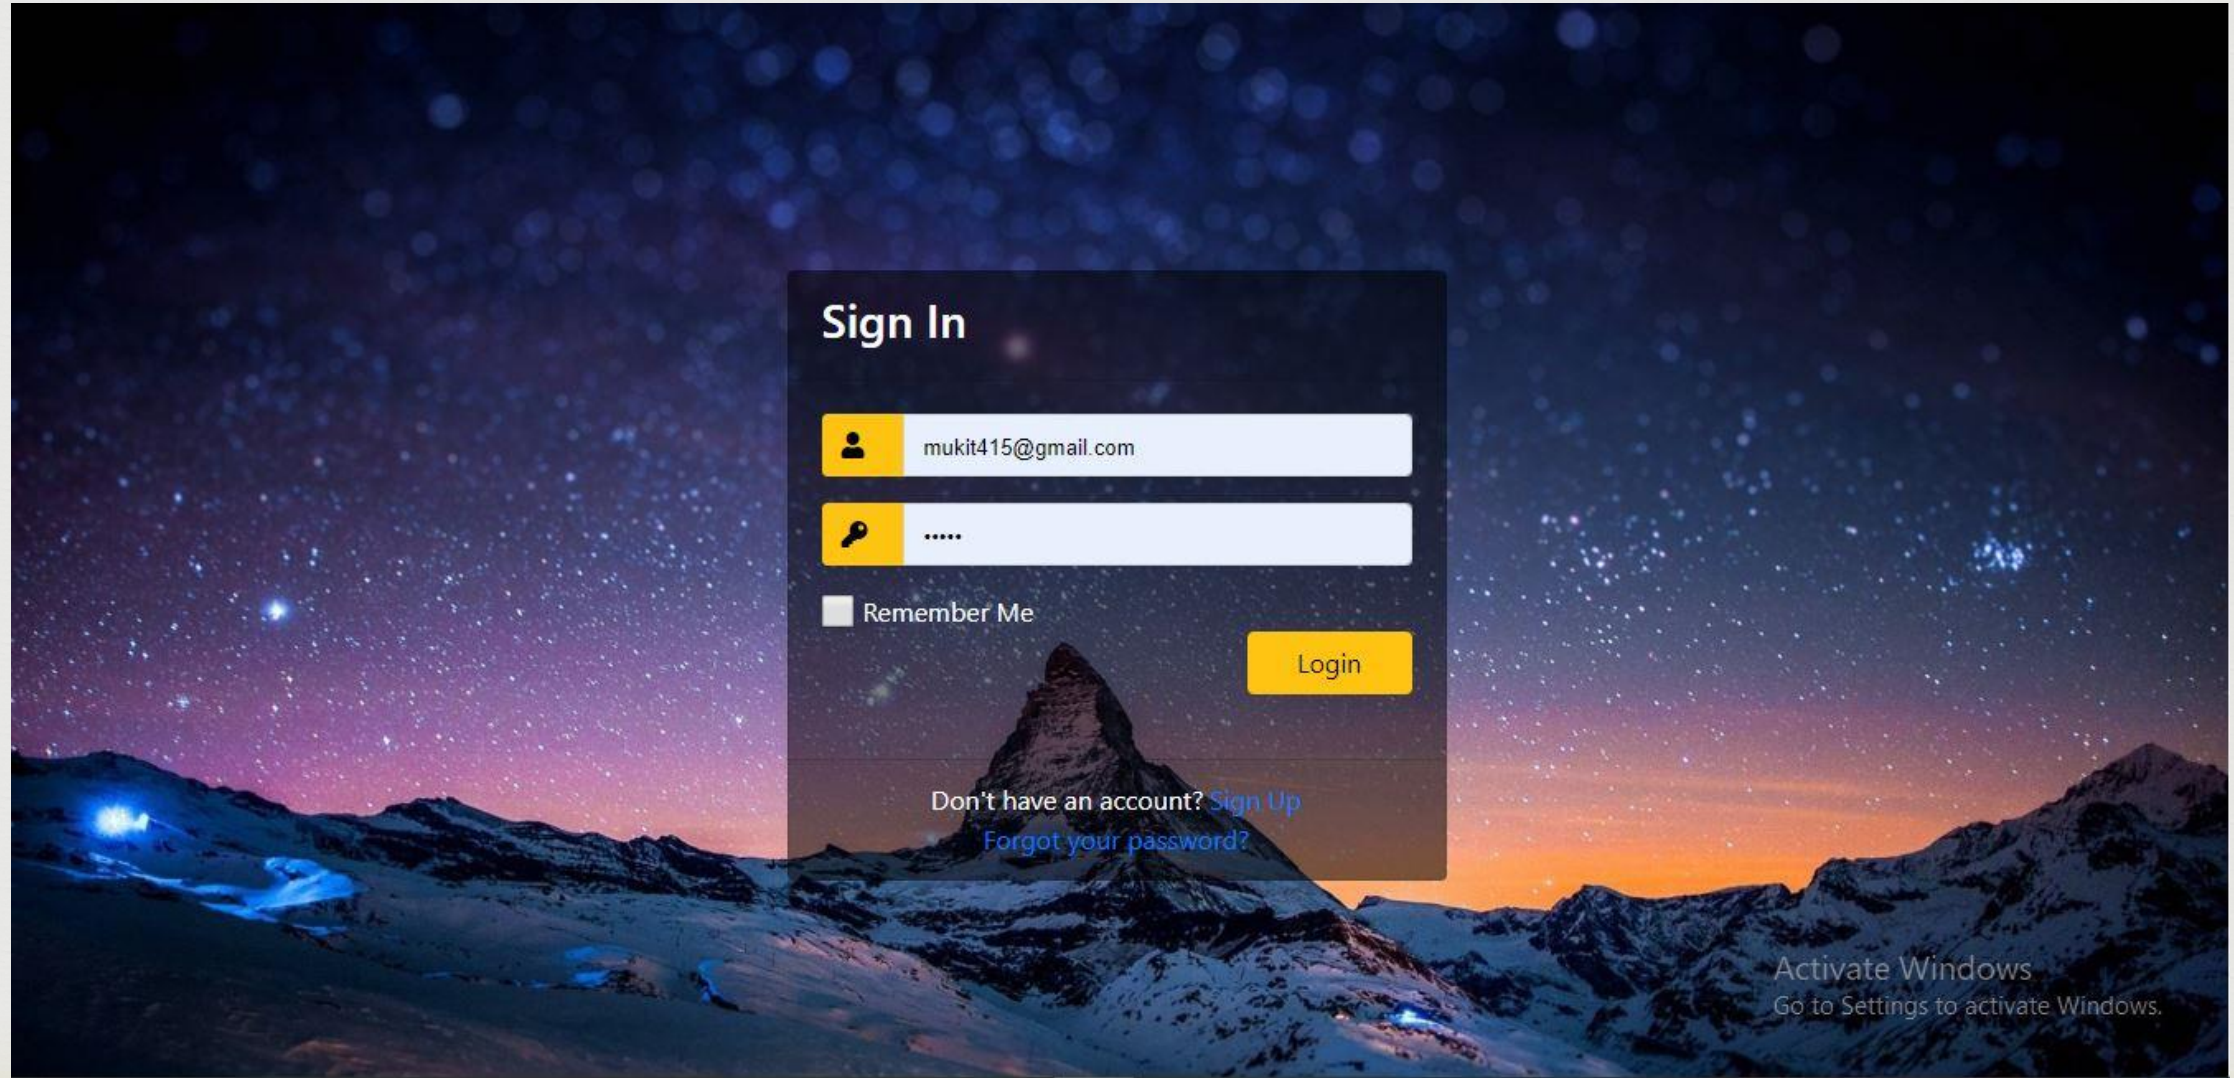

If any user will want to contact with us, he/she can click on Contact Us on the navigation bar. He/she can send any comment or message to us :
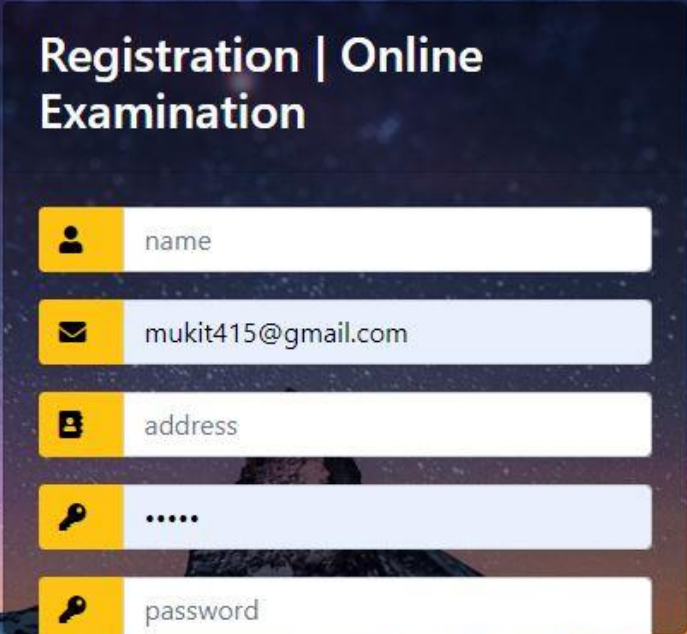

First of all, a student should sign up to this application. After completing the registration form, he must click on the register button.

For example, a student (Md. Abdul Mukit) and his email id email: mukit415@gmil.com. After clicking on register button a mail will send to his email id and it will redirect to login page.

Then he is enlisted to the Database of the online exam where he can participate for the exam

Then the applicant can get login and password to sit in the exam
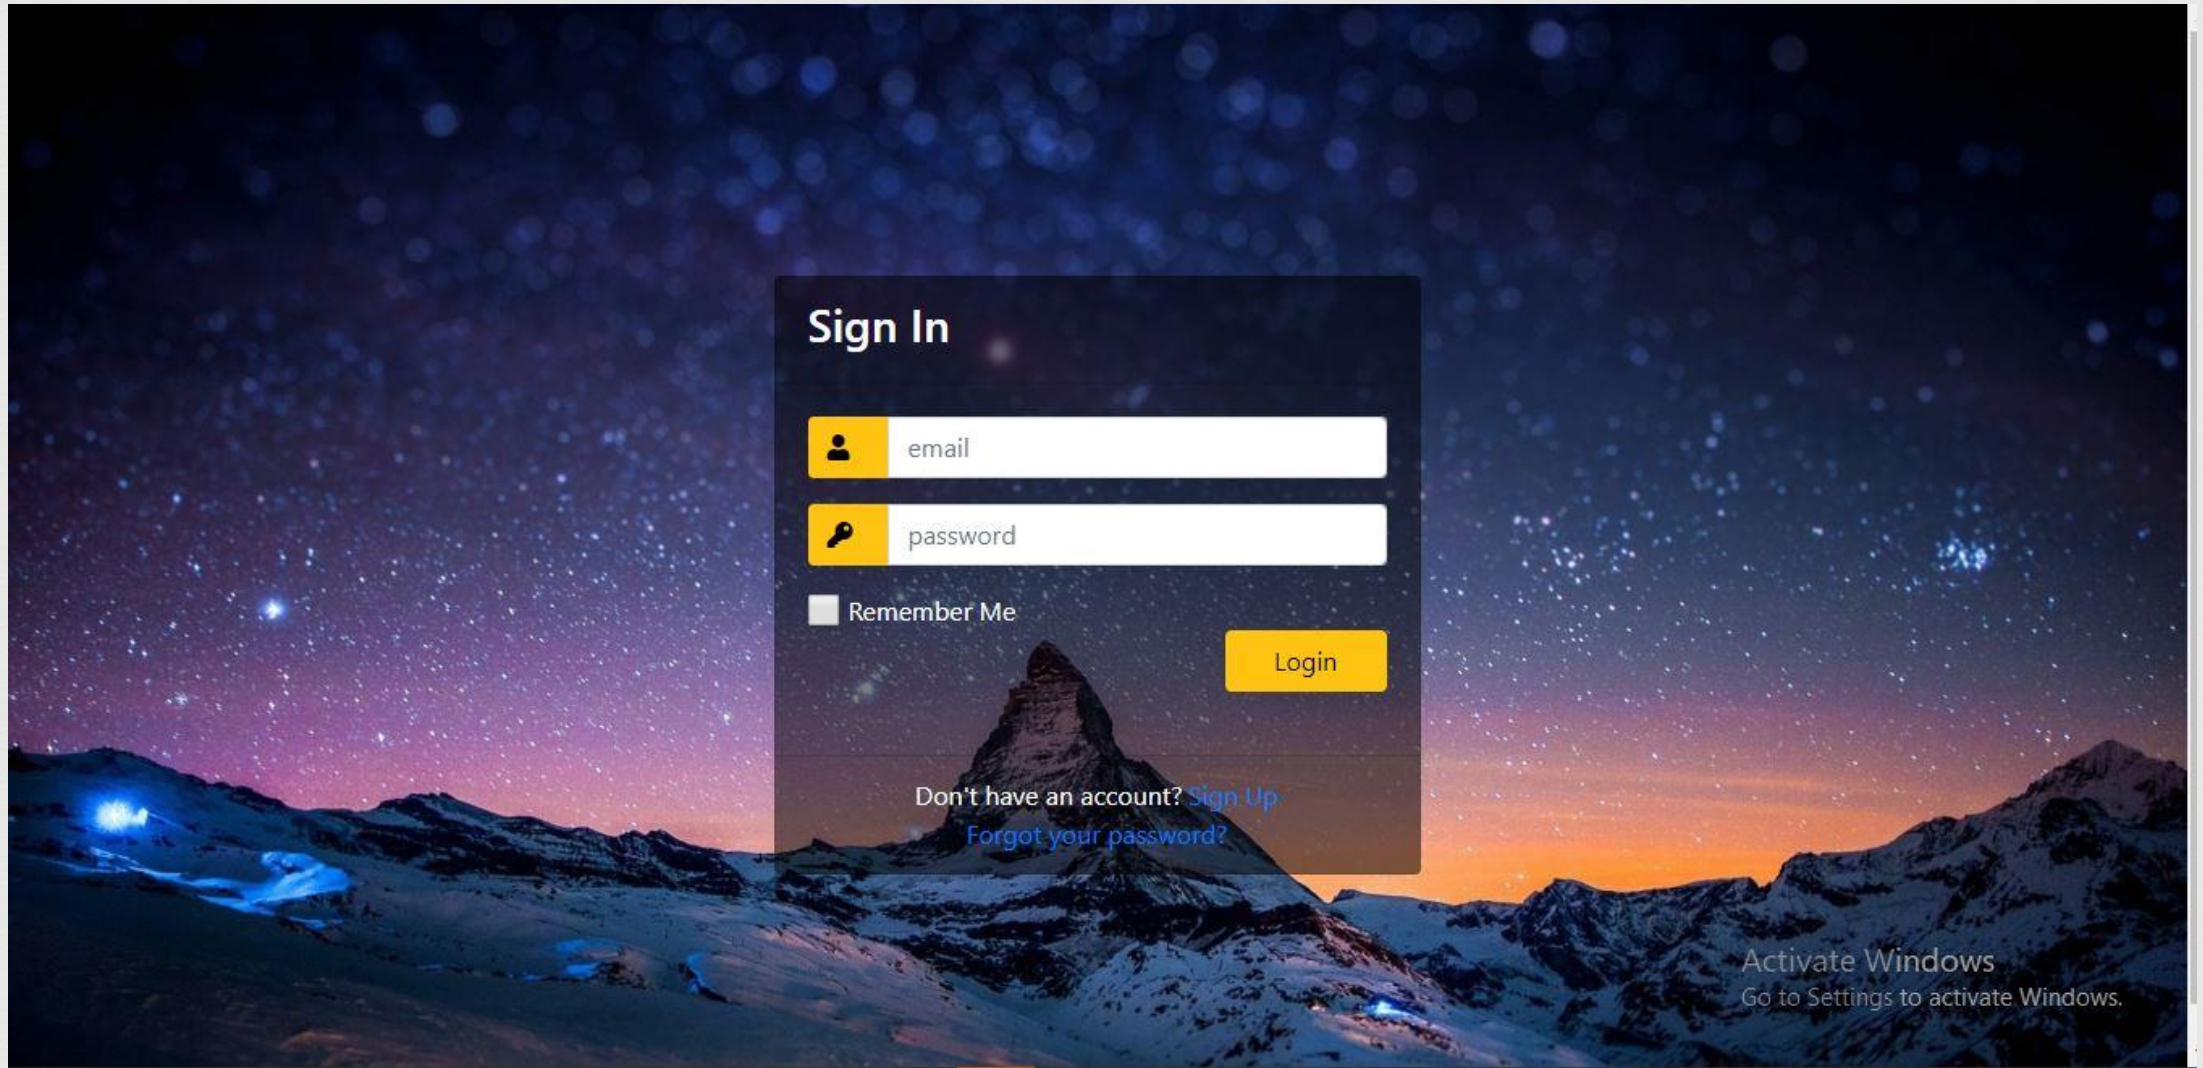

If the user id or password of the student is not valid then the login page will redirect with the following message.
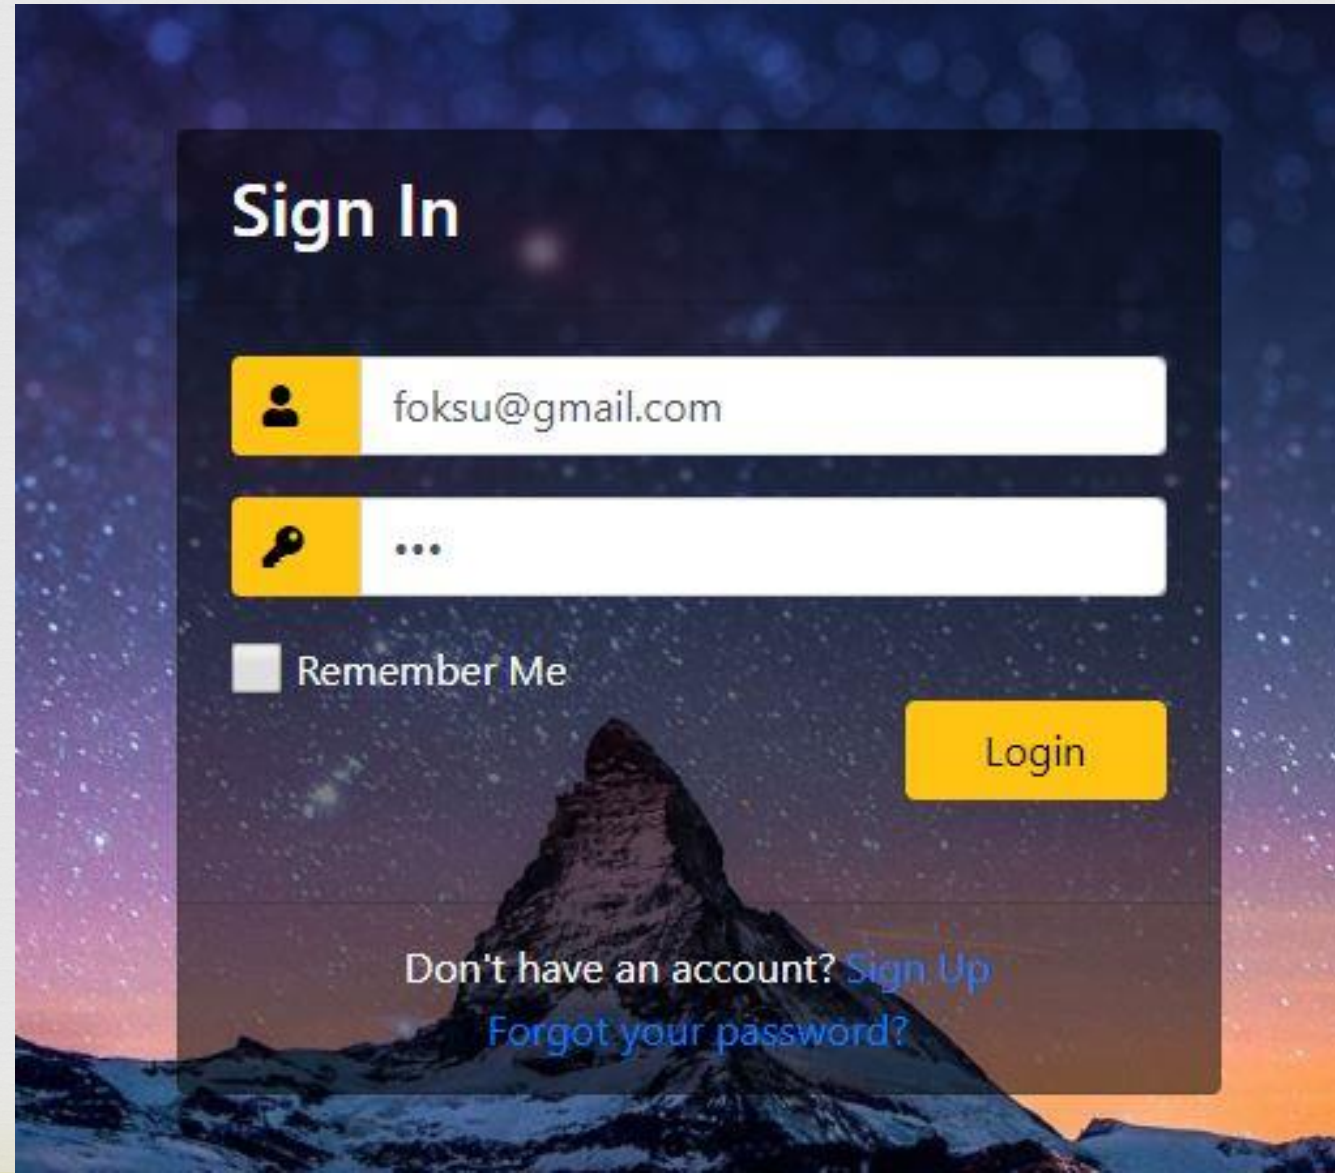

For example, a student(Md. Abdul Mukit) who was previously registered to this application and sign in with his gmail and password.
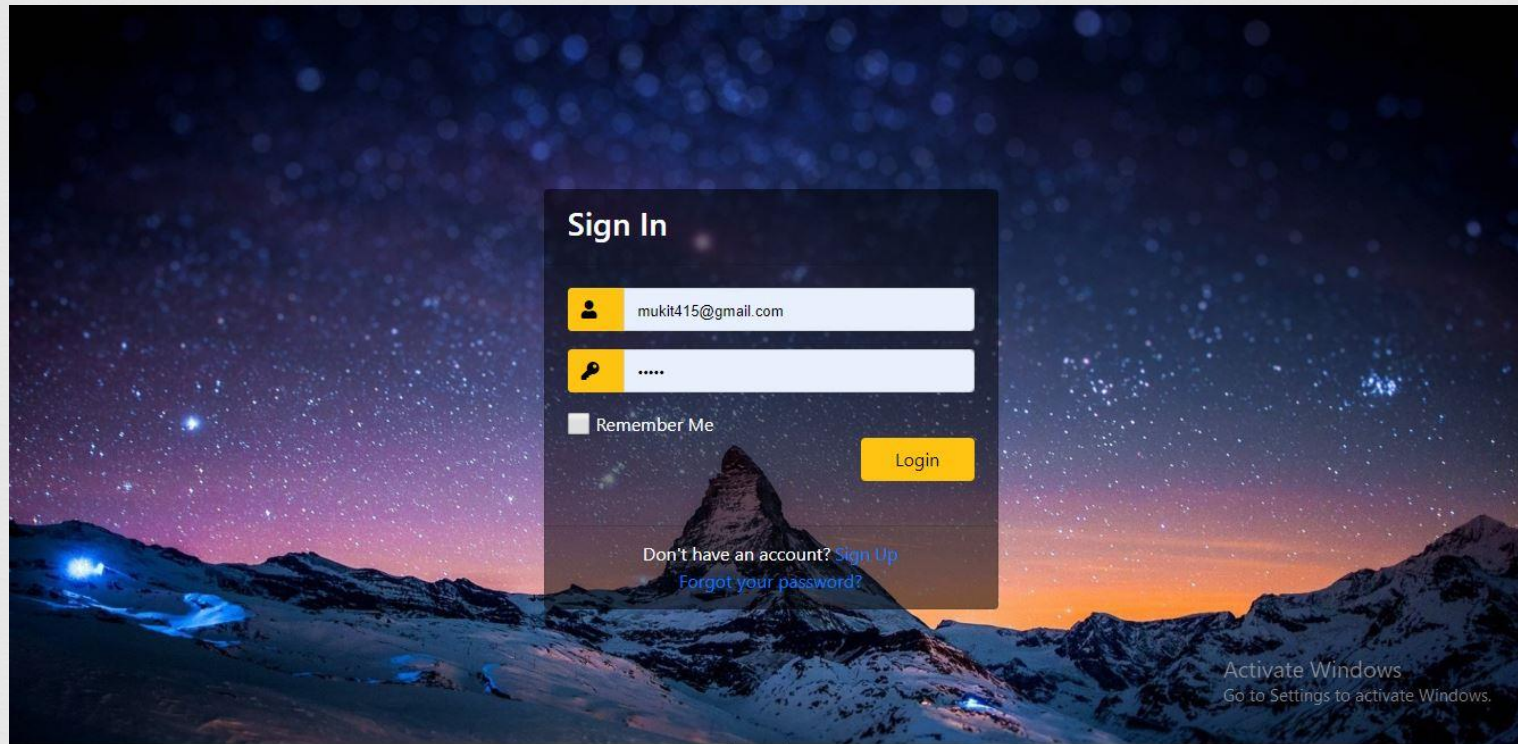

First of all admin login by admin user and password for insert questions
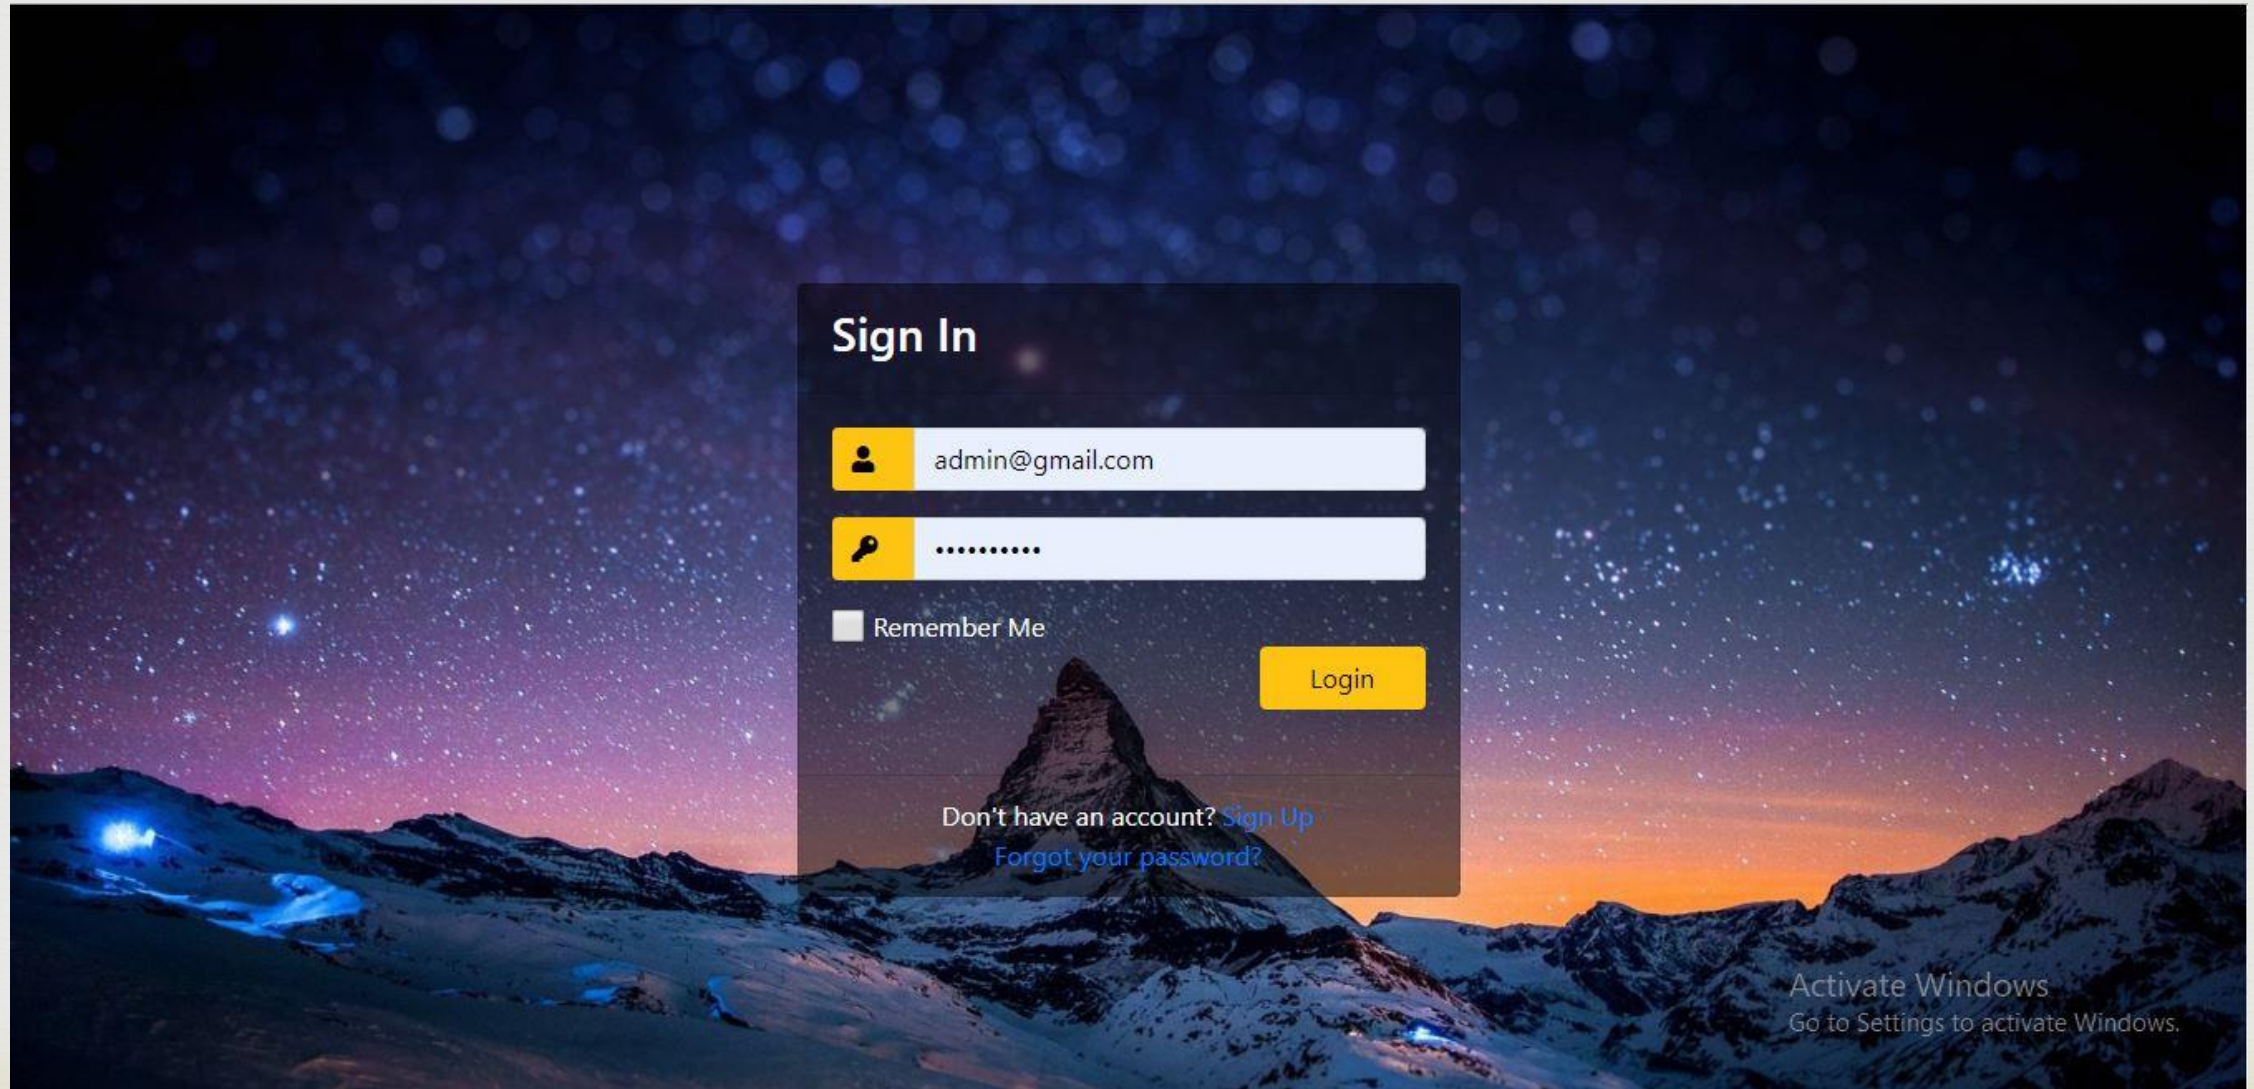

He can insert questions and option a,b,c,d and the correct answer which is stored in the databse

After clicking on the save Question button, then it will save in the database and the question and option can see the question paper and other things preserved in the cpanel

Add Question

Question

Option A :

Option B :
